+91 6205431508 | raushann.shrivastwa@gmail.com | Bihar, India | [GitHub](#) | [LinkedIn](#) | [Leetcode](#) | [CodeChef](#)

SUMMARY

CS undergrad (VIT-AP, 9.09 CGPA) with hands-on experience building distributed systems, containerized microservices, and production-deployed ML platforms, including asynchronous and concurrent request handling in backend services. Proficient in Java, Python, C++, and JavaScript with a strong foundation in data structures and algorithms. Seeking to apply systems design and AI engineering skills to large-scale infrastructure challenges.

EDUCATION

Vellore Institute of Technology – AP

B. Tech in Computer Science; CGPA: 9.09/10.00

2023 – 2027

Amaravati, India

WORK EXPERIENCE

Full Stack Developer Intern – Purple Technology | [Project](#) | [Certificate](#)

Jan 2025 – March 2025

- Developed a **College Connect** web application using **Node.js**, **Express.js**, **MongoDB**, and **Redis**, enabling seamless student interactions and efficient session management.
- Centralized user sessions within **Redis**, improving overall application response time by **15%** and building a more scalable infrastructure to support future growth initiatives.

PROJECTS

AgroMitra – Agricultural Tech Platform | React.js, Node.js/Express, Flask ML APIs, i18n | [GitHub](#) | [Live](#) May 2026

- Led frontend architecture and UX for a full-stack agricultural platform, building **multiple React components** for **farmer, customer and admin** with a decoupled microservices backend, integrating i18n for multilingual interface.
- Designed real-time dashboards **rendering data from 15+ REST endpoints** (weather predictions, crop recommendations, subsidy matching, Razor pay payments) with **concurrent request handling** across farmer, customer, and admin roles; resilient UI states managing high-availability fallback architecture for graceful degradation during ML service outages.

Distributed Architecture Task Orchestrator | Next.js, Node.js, Docker, Jenkins | [GitHub](#)

Feb 2026

- Architected and deployed a full-stack task-orchestration system using **Next.js**, **Node.js**, **Express.js**, and **MongoDB Atlas**, implementing robust **REST APIs** and complete CRUD operations.
- Containerized **microservices** using Docker Compose, **reducing production image size by 50%** via multi-stage builds and automating deployments **with a Jenkins CI/CD pipeline** with every git push.

SwiftMedilink- Healthcare Platform | Python, FastAPI, MERN, Tensorflow, PyTorch, LLM | [GitHub](#) | [Live](#) Oct 2025

- Trained **3 ML models** for disease prediction on **10,000+ labeled medical samples**, achieving **85–95% accuracy**; deployed live on Hugging Face Spaces with real-time inference.
- Built a full-stack healthcare platform with an **LLM-powered chatbot**, OCR prescription digitization, EHR management, and **12+ AI modules** using **React.js**, **FastAPI**, and **MongoDB**, with end-to-end encryption and RBAC across **3 user roles**.

SKILLS

Languages: Java, Python, C, C++, JavaScript

Development: React.js, Next.js, Node.js, Express.js, Spring Boot, HTML5, CSS, Tailwind CSS, Bootstrap, Angular

ML / AI: TensorFlow, Keras, PyTorch, CNN, Transfer Learning, LLM Integration, AI-Agents

Databases: MongoDB, MySQL, PostgreSQL, Firebase, Redis

Tools & Cloud: Git, GitHub, Linux, AWS, Docker, Docker Compose, Jenkins, CI/CD, Cloudflare, Power BI, Excel, Office, PowerPoint

Technical Skills: SDLC, Testing, Debugging, Technical Documentation, Verification & Validation, Code Reviews

Soft Skills: Communication, Critical Thinking, Analytical Skills, Leadership, Creativity, Adaptability, Innovation

CERTIFICATIONS

- Oracle Cloud Infrastructure Certified Foundation Associate (Oracle)** | [Certificate](#)
- Foundation: Data, Data, Everywhere – Google** | [Certificate](#)
- Career Essentials in Generative AI – Microsoft** | [Certificate](#)
- Solved 250+ problems on [Leetcode](#) | 350+ problems on [CodeChef](#) | 100+ problems on GFG**
